PROJECTS

• React eShop App

eShop is an e-commerce web app to sell different products online. Build frontend using HTML, CSS, JavaScript, React.js, and Redux Toolkit, and for database used Firebase database.

• React Contact App

Designed frontend using CSS and made dynamically using React states and React router concepts. Features are to add new contacts update, delete the contacts, add to favorite the contacts, search the contacts in the list update your profile image.

• React Todo App

Designed using Tailwind CSS and to add different features and functionality used React and redux-toolkit. Features like, in frontend users can add important tasks to do, update these tasks, and complete or delete the tasks. After deleting the task user can able to recover these task from the trash.

CERTIFICATES

• Web Frontend Development
